HOTEL VITS BHARAT, NANDED, MAHARASHTRA
09th MARCH, 2026

Turmeric, scientifically known as *Curcuma longa* Linn., is one of the most revered spices of India. Renowned for its bright colour, unique flavour, and healing properties, turmeric is cultivated in almost all states of the country.

India is the largest producer, consumer, and exporter of turmeric and its value-added products in the world, accounting for nearly 70% of global production. During 2024-25, India exported 176325 tons of turmeric valued at 341.54 million USD contributing around 67% in volume and 66% in dollar terms of value of global export of turmeric.

In 2024-25, turmeric was cultivated across 2,90,939 hectares, yielding 11,16,124 metric tonnes with an average productivity of 3.84 MT/ha. The major turmeric-producing states include Maharashtra, Tamil Nadu, Telangana, Madhya Pradesh, Odisha, Karnataka, and Assam.

Maharashtra is a leading turmeric-producing state in India, with over 1.90 lakh hectares under cultivation, making it one of the largest contributors to the country's turmeric output. The state is renowned for its diverse, high-quality turmeric varieties, including three Geographical Indication (GI)-tagged varieties namely Basmat Turmeric, Waigaon Turmeric, and Sangli Turmeric. Each is valued for its unique attributes such as high curcumin content, distinct aroma, and therapeutic properties, which create strong demand in both domestic and international markets.

In 2024-25, turmeric exports from Maharashtra reached 79,784 tons, generating a record ₹131,240 lakh (USD 154.79 million), driven by strong global demand.

With a view to promote the export of turmeric and its value-added products, Spices Board India and the National Turmeric Board are jointly organizing a Buyer-Seller Meet focused on turmeric from Maharashtra.

Around 200 participants, including FPOs, progressive farmers, farmers' societies, processors, traders, and exporters, will attend the event. The list of participants (Buyers/Exporters and Sellers/FPOs) is as follows:
